

Bitpalast® Programming

Success programmed just for you at a fixed price.

Let Bitpalast® develop a unique computer program exclusively for you, such as an online classified ads service, a reservations system, your own search engine, and much more!

Bitpalast® can also perform the smallest programming task with the highest possible commitment and quality, and at a very reasonable price: you benefit from the extremely low costs of the Bitpalast® Software Center in Krasnoyarsk, the center of aeronautical and astronautical development in central Siberia. Krasnoyarsk is an important Siberian center of culture and science, with 970 000 inhabitants, 19 higher education institutions, and over 50 000 students. The IT training there is second to none. All Bitpalast® IT developers are trained to degree level (usually Master of Science in IT). The management is German and English and can be contacted via a toll-free number in Germany and the United States. You can conduct your project with Bitpalast® entirely in English or German. Bitpalast® IT developers have more than 17 years' experience and have completed projects for companies such as T-Systems and Berliner Volksbank. Yet our clients are not only large consumers such as gedas (Volkswagen) or the German Federal Border Police (Bundesgrenzschutz), but also numerous small companies that successfully exploit the Bitpalast® competitive edge for small programming tasks.

Bitpalast® uses your requirements to draft a set of system specifications containing all the important functional conditions of your software. You are given a timeline with handover deadlines and a binding quotation. Regular interim versions of your software are provided. You are encouraged to participate actively and make constructive suggestions. Payment is made in stages after you approve the respective interim versions.

- ✓ High-quality development by IT developers with many years' experience, even for small programming tasks
- ✓ very low costs, full cost transparency and secure budgeting at fixed prices
- ✓ Flexible and virtually risk-free due to frequent interim versions and staggered payment after approving interim versions
- ✓ Access to knowledge and experience that may be lacking in your own company
- ✓ Operative costs instead of investments: good for you in terms of Basel II and your company's ranking

For customers within the EU, the prices do not include VAT. Offer only good for businesses outside Germany with an EU VAT ID.

Bitpalast® Programming project analysis & fixed price offer	free
Minium requirement: low-level specifications must be available	
Bitpalast® Programming consulting by phone and e-mail	free
Bitpalast® Programming on-site consulting (optional), per day	580.00 Euro
Bitpalast® Programming low-level specifications (optional), per hour	24.00 Euro
Bitpalast® Programming high-level specifications (optional), per hour	24.00 Euro
Bitpalast® Programming software development & testing, per hour	24.00 Euro
Bitpalast® Programming documentation (optional), per hour	24.00 Euro

Bitpalast® Programming supports the following languages, systems & platforms:

Dynamic website development

- ✓ ASP
- ✓ Database access via ODBC-, JDBC-, DBI- & ADO-interfaces using SQL
- ✓ Dynamic HTML
- ✓ Flash
- ✓ GIF-Animations
- ✓ Java Server Pages
- ✓ JavaScript
- ✓ Perl
- ✓ PHP
- ✓ VB Script
- ✓ XML

Database development

- ✓ IBM DB2 UDB
- ✓ MS Access
- ✓ MS SQL Server
- ✓ MySQL
- ✓ Oracle
- ✓ PostGreSQL

Application & library development

for Windows

- ✓ COM
- ✓ Inprise C++ Builder
- ✓ Inprise Delphi
- ✓ .Net
- ✓ Visual Basic
- ✓ Visual C++
- ✓ Visual FoxPro

for Unix

- ✓ C/C++
- ✓ Inprise Kylix
- ✓ Java (Java Beans, JDBC)
