

Bitpalast® Hosting Corporate Server

Your server on the Internet with comprehensive 24/7 support

Your Bitpalast® Hosting Corporate Server is an independent computer that can be accessed via the Internet around the clock. This isn't just ideal for teams working at various locations who need to exchange data with each other quickly and securely. Your Bitpalast® Hosting Corporate Server is also the perfect solution for large websites with many users. The possibilities are practically endless. A Bitpalast® Hosting Corporate Server doesn't just consist of hardware and software, but also of comprehensive services:

- ✓ **Professional system administration & free support from personally designated contacts**
Bitpalast® System Administration includes the server system configuration, setup and configuration of over 100 software applications, error resolution in the operating system, plus updates, security patches, and much more. Pre-installed features include HTTP, FTP, POP, IMAP, and SMTP server. You can use the server right away. Technical support is free-of-charge and can be accessed via e-mail, fax, and a toll-free telephone number.
- ✓ **Three-fold data back-up**
The Bitpalast® data back-up includes RAID 1 Disk-to-Disk mirroring (real-time), hard disk back-ups (daily) and tape back-ups (weekly). You can access the back-up data on the hard drive whenever you want using our "Getback" tool.
- ✓ **Secure electricity supply**
Your Bitpalast® Hosting Corporate Server includes all the safeguards against electricity supply that Bitpalast® data centers provide, including automatic power supply back-up.
- ✓ **Secure environment**
Your Bitpalast® Hosting Corporate Server is located in a secure Bitpalast® main data center. Further, system administrators don't just monitor your server, but also the network and data center around the clock.
- ✓ **Fast & secure connection**
In the global Bitpalast® NTT/VERIO IP data network, your web pages are delivered to customers faster and more securely. If required, your web server can be operated in whichever of the more than 100 Bitpalast® NTT/VERIO data centers is located in your customer's region. Additional Bitpalast® services – such as global HTTP and streaming caching, guaranteed bandwidth, and world-wide load balancing (each available separately) – you can increase performance yet further.

Even if you only need a server on the Internet for a short time, Bitpalast® is the right choice as you can terminate the contract with only 14 days' notice to the end of the month (which Bitpalast® would naturally regret very much). Bitpalast® Hosting Corporate Servers are the perfect solution for your company. Compared with your own on-site server, you save on costs for security, hardware, bandwidth, data security, connection, and working time. Bitpalast® relieves you of all routine tasks and makes sure that your Bitpalast® Corporate Server is working for you around the clock with the highest possible reliability and accessibility.

Bitpalast GmbH, Sensburger Allee 27, D-14055 Berlin, Germany
Phone +49 30 32 70 18 92, fax +49 30 32 70 18 91, service@bitpalast.net

1) Only for Sun™ Solaris™ server version. © 2003 Bitpalast GmbH. All rights reserved. Bitpalast® is a registered trademark of Bitpalast GmbH. All other brands are registered trademarks of their respective owners.

Your Bitpalast® team keeps many pre-installed and installable applications on hand and can set them up for you as you require (you could do this yourself, but we make your work easier for you). These applications include Microsoft™ FrontPage™ extensions, PHP, Java™ servlets¹ & JSPs¹, Miva, Compiler für C, C++ & Java™, Perl, Tcl, Python and Unix Shell programs, Urchin², WebTrends², Analog, http-analyze, Webalizer, mSQL, MySQL, PostgreSQL, Oracle Gateways, RealServer², Pretty Good Privacy, Majordomo, Procmail, Autoreply, TWIG, VNews, SSL³ and more than 80 other ready-to-run applications. You can also of course install your own applications.

You can lease Bitpalast® Hosting Corporate Servers in two versions:

Version 1: IBM™ Intel Pentium™ III 700 MHz with FreeBSD 4.2 (Linux compatible)
Version 2: Sun™ UltraSparc™ III 440 MHz with Sun™ Solaris™ 2.6

with 512 MB RAM, 3x18 GB SCSI hard disks (1x for hard disk mirroring, 1x for hard disk back-up, 1x for operating system and applications, 16 GB total storage capacity available to applications, extendible up to 34 GB), 50 GB data transfer per month (extendible to 250 GB).

For customers within the EU, the prices do not include VAT. Offer only good for businesses outside Germany with an EU VAT ID.
